## Messaging

Messaging is a key component of a work environment designed to increase human productivity. With the 2004 announcement of IBM Workplace™ software and solid investment in the ongoing evolution of IBM Lotus® Notes® and IBM Lotus Domino® products, IBM continues to deliver quality messaging solutions to meet the needs of user communities in companies of any size.

IBM messaging software provides e-mail, personal contacts and calendar and scheduling options with the flexibility to combine a powerful application development environment—bringing people together regardless of location or connectivity. IBM delivers these capabilities on two parallel yet complementary platforms: one built on IBM Lotus Domino technology and the other based on service-oriented architecture (SOA) using the Java™ 2 Platform, Enterprise Edition (J2EE) application framework. IBM Lotus and IBM Workplace messaging products can be combined to provide you optimum flexibility, choice and adaptability to meet your changing needs.

Security-rich, scalable, reliable and manageable, IBM messaging software helps ensure a comprehensive collaborative experience with back-end relational databases and integrated instant messaging, and offers connectivity with many mobile devices.

For more information, visit [ibm.com/software/workplace/messagingsoftware](http://ibm.com/software/workplace/messagingsoftware).

## Messaging products

### *IBM Lotus Domino*

Provides, through a choice of servers, a full-featured, reliable, scalable, security-rich multiplatform foundation for collaboration and On Demand Business environments, driving solutions from corporate messaging to Web-based applications. Lotus Domino technology software products can also be key components of an IBM Workplace environment. Lotus Domino is available in three offerings: Domino Messaging Server (messaging only) Domino Utility Server (applications only) and Domino Enterprise Server (both messaging and applications). Domino Utility Server also includes entitlement to IBM Lotus Domino Document Manager and IBM Lotus Workflow® software. Visit [ibm.com/lotus/domino](http://ibm.com/lotus/domino).

Three primary Lotus Domino messaging clients are available:

### **IBM Lotus Notes**

The full-featured, security-rich client for e-mail, calendar, group scheduling, Web access and information management functionalities—all integrated in an easy-to-use and customizable environment—online or offline. Includes entitlement to integrated instant messaging and online awareness capabilities. Visit [ibm.com/lotus/notes](http://ibm.com/lotus/notes).

### **IBM Lotus Domino Web Access**

The award-winning, advanced Web-based client, delivering leading Lotus Domino messaging, collaboration and personal information management capabilities to online or offline Web browsers. Includes entitlement to integrated instant messaging and online awareness capabilities. Visit [ibm.com/lotus/dominowebaccess](http://ibm.com/lotus/dominowebaccess).

## Simply a better way to connect with business

### **IBM Lotus Domino Access for Microsoft Outlook**

The native functions of Lotus Domino software—like messaging, calendar, replication, directory, security features and Web access—for easy migration from Microsoft® Exchange to Lotus Domino, allowing users to continue working with familiar Outlook clients—delivered to the Microsoft Outlook client, online or offline. Visit [ibm.com/lotus/dominoaccessforoutlook](http://ibm.com/lotus/dominoaccessforoutlook).

### **IBM Lotus Domino Express**

Provides enterprise-class messaging and collaboration capabilities to companies that employ 1,000 people or fewer. Lotus Domino Express delivers the capabilities of Lotus Domino technology and its messaging and collaboration clients that are most applicable to the needs of small and midsize businesses. Three Domino Express offerings are packaged and priced to provide cost-effective functionality with simplified licensing and reduced administration requirements: Domino Messaging Express (messaging only), Domino Utility Express (applications only) and Domino Collaboration Express (messaging and applications). Visit [ibm.com/lotus/dominoexpress](http://ibm.com/lotus/dominoexpress).

### **IBM Lotus Domino Everyplace®**

Extends the capabilities of Lotus Domino technology to provide a comprehensive platform for reliable and easy-to-administer mobile and wireless device services in a security-rich environment. Helps you provide wireless access to e-mail, calendars and directories, as well as rich collaborative applications. You can access your Lotus Domino

software-based information from supported wireless and handheld devices—like personal digital assistants (PDAs), pagers and digital phones—supporting industry standards, such as Wireless Application Protocol and Short Message Service. Visit [ibm.com/lotus/dominoeveryplace](http://ibm.com/lotus/dominoeveryplace).

### **IBM Lotus EasySync® Pro**

Allows you to synchronize e-mail messages, calendar information, tasks, contacts and memo information between Lotus Notes systems and most commonly used PDAs. Visit [ibm.com/lotus/easysyncpro](http://ibm.com/lotus/easysyncpro).

### **IBM Workplace Collaboration Services**

Provides standards-based e-mail, calendaring and scheduling and a personal address book with a choice of rich-client or basic browser experience, so everyone in an organization can stay connected and communicate more effectively. This single software product provides a completely integrated environment for everyday collaboration with many capabilities in addition to messaging, including presence awareness, instant messaging, learning, team spaces, Web conferencing, document and Web content management. Visit [ibm.com/software/workplace/collaborationservices](http://ibm.com/software/workplace/collaborationservices).

### **Real-time and team collaboration**

Collaborate with colleagues, customers, business partners and suppliers, and generate results. Use presence awareness and instant messaging to see who is online and available to converse in real time from your desktop or favorite wireless

devices—now integrated into Lotus Notes and many IBM Workplace products. Use Web conferences to share a document, application or your entire desktop. And use team spaces to centralize and share information about any project or ad hoc initiative. IBM offers a range of real-time and team collaboration products that can be used stand-alone, as an integrated solution or in the context of other applications. These products are available in multiple languages, provide cross-platform support and embrace open standards. Most important, they are designed to help meet your unique business needs.

For more information, visit [ibm.com/software/workplace/realtimeteamcollaboration](http://ibm.com/software/workplace/realtimeteamcollaboration).

### **Real-time and team collaboration products**

#### ***IBM Lotus Instant Messaging and Web Conferencing***

Help increase responsiveness and access to experts by using presence awareness, security-rich instant messaging and Web conferencing, enabling people to quickly connect or meet, share information and collaborate in real time without leaving their desks. Distributed teams sharing information, presentations or whiteboards and conducting virtual online meetings can reduce business travel costs and extend their reach to more customers, suppliers and vendors. Helps companies, communities and teams work at greater efficiency while potentially lowering costs. Visit [ibm.com/lotus/instantmessagingandwebconferencing](http://ibm.com/lotus/instantmessagingandwebconferencing).

#### ***IBM Lotus Web Conferencing***

Enables people to work together online, instantly and in a security-rich environment, from wherever they are located, using an intuitive meeting-room metaphor. Participants can view shared presentations, documents and applications with their Web browser, and document spontaneous ideas and interactions using the online whiteboard. Flexible purchasing options include both on-premise and hosted deployment options. Based on the market-leading product, Lotus Instant Messaging and Web Conferencing. Visit [ibm.com/lotus/webconferencing](http://ibm.com/lotus/webconferencing).

#### ***IBM Lotus Team Workplace***

Allows you to instantly create and share security-rich work spaces on the Web. Teams can use this self-service, Web-based solution to quickly assemble and collaborate—using discussion areas, file libraries, group calendars and task management—and by creating and editing documents using familiar Microsoft Office tools. Visit [ibm.com/lotus/teamworkplace](http://ibm.com/lotus/teamworkplace).

#### ***IBM Lotus Web Conferencing Management Server***

Provides Lotus Instant Messaging and Web Conferencing communities with a highly scalable infrastructure for managing large, globally dispersed Web conferencing environments. This add-on product performs load balancing, failover and central administration across Lotus Instant Messaging and Web Conferencing servers for a reliable, integrated, enterprise meeting infrastructure. Visit [ibm.com/lotus/instantmessagingandwebconferencing](http://ibm.com/lotus/instantmessagingandwebconferencing).

## Simply a better way to connect with business

### *IBM Lotus Instant Messaging Everyplace*

Extends the instant messaging and presence awareness capabilities of Lotus Instant Messaging software to supported handheld wireless devices, such as mobile phones, pagers and PDAs. Visit [ibm.com/lotus/instantmessagingeveryplace](http://ibm.com/lotus/instantmessagingeveryplace).

### *IBM Workplace Collaboration Services—real-time and team collaboration services*

IBM Workplace Collaboration Services is a single software product providing a completely integrated environment for everyday collaboration with many capabilities in addition to real-time and team collaboration, including e-mail, calendaring and scheduling, learning, and document and Web content management.

#### **Instant messaging services**

Provide seamlessly integrated presence awareness and instant messaging across all of the collaborative capabilities to enable individuals, teams and entire organizations to be more productive when working within a Workplace environment.

#### **Team space services**

Enable organizations to bring together dispersed team members to collaborate more effectively by using shared team spaces based on either ready-to-use or customized templates to meet unique business needs.

### **Web conferencing services**

Provide integrated Web conferencing across a Workplace environment to provide instant access to live meeting capabilities so that team members can share presentations and collaborate in real time.

Visit [ibm.com/software/workplace/collaborationservices](http://ibm.com/software/workplace/collaborationservices).

### *IBM Workplace Services Express*

Provides a complete, easy-to-use single server platform for team collaboration. Its integrated portal makes it easy for you and your colleagues to work together, by providing easy-to-use and easy-to-customize team spaces to create, edit and share documents. Workplace Services Express can be set up and deployed in minutes, and customized for many group scenarios. Visit [ibm.com/software/workplace/servicesexpress](http://ibm.com/software/workplace/servicesexpress).

### *IBM WebSphere Portal Extend for Multiplatforms*

Builds on the portal framework of IBM WebSphere® Portal Enable software, adding rich real-time and team collaboration capabilities from Lotus software, such as presence awareness, instant messaging and virtual teamrooms. Designed for organizations deploying multiple business-to-business, business-to-consumer and business-to-employee portals that feature team and collaboration functions. Visit [ibm.com/software/genservers/portal/extend](http://ibm.com/software/genservers/portal/extend).

### *IBM WebSphere Portal - Express Plus*

Builds on the capabilities provided by WebSphere Portal - Express, with additional collaboration capabilities such as virtual teamrooms, integrated instant messaging, team calendar

and project management functions. Visit [ibm.com/software/genservers/portalexpress/plus/](http://ibm.com/software/genservers/portalexpress/plus/).

### **Collaborative application development and portal**

Since 1989, Lotus Notes and Domino technology has provided customers with much more than just e-mail. Many businesses choose Lotus Notes and Domino software over its competition for an attractive return on investment (ROI) by leveraging the extensive application development functionality of IBM Lotus Domino Designer® technology. Whether you're using simple threaded discussion databases for employees and extended communities to share knowledge, or running core, people-driven business applications, such as customer relationship management (CRM), help desk or supply chain management, Lotus Domino software can help your business thrive. And now IBM Workplace Designer will give you a similar, easy way to use document-oriented programming for the IBM Workplace environment.

*Integrate your Lotus Domino applications with IBM DB2®, Oracle or SAP systems. And Lotus Domino applications integrate with IBM Workplace environments and WebSphere Portal solutions, so your investment can be extended even further, giving more people using more devices access to your Lotus Domino solutions.*

IBM Workplace, Lotus and WebSphere Portal software products work together to create solutions that provide a single, integrated, personalized point of access to information, applications, productivity tools and experts. You can rapidly find and share information among multiple applications

and locate people in multiple locations, so they can work more effectively and make better decisions. The WebSphere Portal family of products combines IBM Lotus collaboration software, IBM WebSphere Application Server, IBM Tivoli® systems management software and IBM DB2 data management software, leveraging the benefits of solutions throughout the IBM software portfolio.

*WebSphere Portal solutions simplify and integrate access to your IBM Workplace and Lotus Domino applications—along with other information, business processes and applications.*

For more information, visit [ibm.com/software/workplace/applicationdevelopment](http://ibm.com/software/workplace/applicationdevelopment).

### **Collaborative application development and portal products**

#### ***IBM Lotus Domino Designer***

Allows application developers and Web site designers to rapidly build security-rich, multiplatform collaborative applications to help streamline business processes and increase workflow efficiency. With the capabilities of a single tool, Lotus Domino Designer software enables you to develop applications that are accessible from Lotus Notes clients, Web browsers and mobile devices. Lotus Domino Designer technology can also help you quickly and cost-effectively deliver multilingual applications to facilitate global deployment. Visit [ibm.com/lotus/dominodesigner](http://ibm.com/lotus/dominodesigner).

#### ***IBM Lotus Workflow***

Provides a platform for automating, refining and managing complex business processes to help improve response time and reduce costs for Lotus Domino and Java technology-based applications. Lotus Workflow is a stand-alone application

## Simply a better way to connect with business

development tool that works on top of IBM Lotus Domino to automate people-based work activities. Visit [ibm.com/lotus/workflow](http://ibm.com/lotus/workflow).

### ***IBM Lotus Enterprise Integrator®***

Enables high-performance, scalable exchange of data between Lotus Domino applications and many host and relational applications—including DB2 data management software, Oracle, Sybase, OLE DB, Text and Open Database Connectivity (ODBC) data sources, as well as enterprise resource planning (ERP) applications. This enterprise application integration tool helps ensure that data is shared across systems, on virtually any platform. Visit [ibm.com/lotus/lei](http://ibm.com/lotus/lei).

### ***IBM Lotus connectors***

Leverage native access to a wide variety of data structures, like DB2, Oracle, Sybase, SQL Server, ODBC and file systems with this set of Lotus base connectors. Access to ERP systems and transaction processing systems—like SAP, PeopleSoft and Oracle—is available through premium connectors. These connectors provide a solid foundation across all enterprise integration offerings. Visit [ibm.com/lotus/enterpriseintegration](http://ibm.com/lotus/enterpriseintegration).

### ***IBM Lotus Team Workplace***

Allows you to instantly create and share security-rich work spaces on the Web, including discussion areas, file libraries, group calendars, task management and instant messaging. Documents are created and edited using familiar tools, such

as Microsoft Office. Using just your browser, it's a snap to build and assemble collaborative applications and team space templates that help make your teams more productive and more self-sufficient. Visit [ibm.com/lotus/teamworkplace](http://ibm.com/lotus/teamworkplace).

### ***IBM Lotus Instant Messaging and Web Conferencing***

Enables you to inject presence awareness and instant messaging into other applications. For example you can use the Lotus Instant Messaging Links toolkit to easily add presence awareness and chat to any Web page or use the COM+ toolkit to add presence awareness and chat to Microsoft Windows® applications such as Microsoft Outlook. Visit [ibm.com/lotus/instantmessagingandwebconferencing](http://ibm.com/lotus/instantmessagingandwebconferencing).

### ***IBM Workplace Designer***

Enables quick and easy creation of components for release 2.5 of IBM Workplace products, which can then be used within IBM Workplace applications from any Web browser. Workplace Designer will give you an easy way to use document-oriented programming for collaborative components without requiring an in-depth knowledge of Java technology. Planned for release in Q305. Visit [ibm.com/software/workplace](http://ibm.com/software/workplace) for updates.

### ***IBM Workplace Client Technology™ - Rich Edition***

Provides an application development framework that can be used to extend the user experience of browser-based applications. Visit [ibm.com/software/workplace/managedclient](http://ibm.com/software/workplace/managedclient).

### ***IBM Workplace Services Express***

Provides a complete, easy-to-use single server platform for team or departmental collaboration. Its integrated portal makes it easy for you and your colleagues to work together, by providing easy-to-use and easy-to-customize team spaces to collaborate on, create, edit and share documents. Easy and elegant interactions between Microsoft Office, plus several built-in editors give you flexibility and choice in the way your teams create and collaborate on documents. A new Workplace Services Express server can be set up and deployed in under an hour, and customized for just about any team's requirements. Visit [ibm.com/software/workplace/servicesexpress](http://ibm.com/software/workplace/servicesexpress).

### ***IBM WebSphere Portal Enable for Multiplatforms***

Helps you build scalable portals that simplify and speed access to personalized information and applications. An entry-level, highly flexible offering, it provides core portal capabilities for businesses that need to launch a portal quickly. Visit [ibm.com/software/genservers/portal/enable](http://ibm.com/software/genservers/portal/enable).

### ***IBM WebSphere Portal Extend for Multiplatforms***

Builds on the portal framework of WebSphere Portal Enable, adding rich collaborative capabilities from Lotus software, such as presence awareness, instant messaging and team work spaces. Also provides extended search and Web analysis capabilities. Designed for organizations deploying multiple business-to-business, business-to-consumer and business-to-employee portals that feature team and collaboration functions. Visit [ibm.com/software/genservers/portal/extend](http://ibm.com/software/genservers/portal/extend).

### ***IBM WebSphere Portal - Express***

Allows your small or midsize business to deploy a portal solution quickly, simply and cost-effectively. Provides single sign-on to multiple applications, document management and other portal services related to presentation, connectivity, customization and application development. Visit [ibm.com/software/genservers/portalexpress](http://ibm.com/software/genservers/portalexpress).

### ***IBM WebSphere Portal - Express Plus***

Builds on the capabilities provided by WebSphere Portal - Express, with additional collaboration capabilities such as virtual teamrooms, integrated instant messaging, team calendar and project management functions. Visit [ibm.com/software/genservers/portalexpress/plus](http://ibm.com/software/genservers/portalexpress/plus).

## **Document and Web content management**

Make it easy for all levels of employees to collaboratively create, organize, share and publish important business information with document and Web content management software so you can provide the right information to the right people—on demand where and when they need it. IBM collaboration document and Web products are integral components of the IBM Content Management portfolio, including DB2 and other data management products, and are available for both IBM Lotus Domino and IBM Workplace environments.

For more information, visit [ibm.com/software/workplace/docandwebcontentmanagement](http://ibm.com/software/workplace/docandwebcontentmanagement).

## Simply a better way to connect with business

### **Document and Web content management products**

#### ***IBM Lotus Domino Document Manager***

Provides a ready-built solution for organizing documents for effective, security-rich shared access by work teams, managing versions so that each team member has the latest version and automating document-driven processes like review, approval, assembly, publishing and archiving. Manages documents efficiently and predictably throughout the life cycle, including version control, collaborative document creation (check-in and check-out), document indexing, access, rendering, retention and archiving, creating new efficiencies and building the foundation for content management processes. Visit [ibm.com/lotus/dominodoc](http://ibm.com/lotus/dominodoc).

#### ***IBM Lotus Team Workplace***

Allows you to instantly create and share security-rich work spaces on the Web. Teams can use this self-service, browser-based solution to quickly collaborate—using discussion areas, file libraries, group calendars and task management—and by creating and editing documents using familiar tools, such as Microsoft Office. With built-in collaborative document management, it's a snap to create and use libraries where people can work together to produce documents. Visit [ibm.com/lotus/teamworkplace](http://ibm.com/lotus/teamworkplace).

#### ***IBM Lotus Extended Search***

Provides parallel search across many content and data sources, returning aggregated query results into a Web application. Lotus Extended Search is a scalable, server-based technology that easily integrates with your e-business applications to find all the information you need from one intuitive interface, helping you find relevant information from diverse sources within a single search without creating additional indexes. Visit [ibm.com/lotus/extendedsearch](http://ibm.com/lotus/extendedsearch).

### ***IBM Workplace Collaboration Services—document and Web content management services***

IBM Workplace Collaboration Services is a single software product providing a completely integrated environment for everyday collaboration with many capabilities in addition to document and Web content management, including e-mail, calendaring and scheduling, instant messaging, presence awareness, Web conferencing, learning and team spaces.

#### **Document services**

Provide standards-based document management capabilities with a choice of rich-client or basic browser experience to manage the complete life cycle of office documents, from inception to collaborative authoring to review, approval and archiving.

#### **Web content management services**

Provide Web content management capabilities to help streamline the Web content management process by allowing content experts to author and publish Web content quickly and easily.

Visit [ibm.com/software/workplace/collaborationservices](http://ibm.com/software/workplace/collaborationservices).

### ***IBM Workplace Web Content Management***

Helps streamline the Web content management process. With its rapid content deployment capability and point-and-click interface, IBM Workplace Web Content Management™ software helps relieve IT and webmaster bottlenecks by placing content creation and management in the hands of content experts for author once, publish everywhere control. It also helps reduce content development and implementation time with its reusable site component architecture—and you can use Lotus Domino, DB2 Content Manager or Oracle systems as content repositories. Visit [ibm.com/software/workplace/webcontentmanagement](http://ibm.com/software/workplace/webcontentmanagement).

***IBM Workplace Web Content Management - Standard Edition***

Provides an entry-level offering of IBM Workplace Web Content Management—specifically for departmental or small and midsize organizations. Visit [ibm.com/software/workplace/webcontentmanagement](http://ibm.com/software/workplace/webcontentmanagement).

***IBM Workplace Services Express***

Provides a complete, easy-to-use single server platform for team collaboration. Its integrated portal makes it easy for you and your colleagues to work together, by providing easy-to-use and easy-to-customize team spaces to create, edit and share documents. Easy and elegant interactions between Microsoft Office, plus several built-in editors give you flexibility and choice in the way your teams create and collaborate on documents. A new Workplace Services Express server can be set up and deployed in under an hour, and customized for just about any team's requirements. Visit [ibm.com/software/workplace/servicesexpress](http://ibm.com/software/workplace/servicesexpress).

***IBM WebSphere Portal Enable for Multiplatforms***

In addition to document management and other core portal capabilities, this entry-level portal now has improved Web content management and support for business process integration and virtual portals, all on a platform supporting enterprise-class scalability and availability. Visit [ibm.com/software/genservers/portal/enable](http://ibm.com/software/genservers/portal/enable).

***IBM WebSphere Portal Extend for Multiplatforms***

Builds on the portal framework of WebSphere Portal Enable, adding rich, real-time and team collaboration capabilities. Also provides extended search and Web analysis capabilities.

Designed for organizations deploying multiple business-to-business, business-to-consumer and business-to-employee collaboration portals. Visit [ibm.com/software/genservers/portal/extend](http://ibm.com/software/genservers/portal/extend).

***IBM WebSphere Portal - Express***

Designed for small or midsize businesses looking to deploy a portal solution quickly, simply and cost-effectively. Provides single sign-on to multiple applications, document management and other portal services related to presentation, connectivity, customization and application development. Visit [ibm.com/software/genservers/portalexpress](http://ibm.com/software/genservers/portalexpress).

***IBM WebSphere Portal - Express Plus***

Builds on WebSphere Portal - Express, with additional collaboration capabilities such as virtual teamrooms, integrated instant messaging, team calendar and project management functions. Visit [ibm.com/software/genservers/portalexpress/plus](http://ibm.com/software/genservers/portalexpress/plus).

**Learning**

IBM learning software streamlines the management and delivery of learning resources to users to help ensure they have the skills needed to meet job requirements. Delivering up-to-date, relevant training can help increase workforce productivity, accelerate employees' time to performance, and increase workers' knowledge of new products, business processes and technologies. By providing access to training anytime, anywhere, it allows your global enterprise to cost-effectively train a dispersed workforce, helping to reduce travel costs and lost productivity.

## Simply a better way to connect with business

IBM offers a set of flexible, standards-based learning modules that scale smoothly from departmental implementation to enterprise-wide deployment and integrate with each other, with other learning systems, with enterprise back-end systems and with portals and on demand work environments. The modular design of these components provides the flexibility to first deploy learning in the areas that will have the largest impact on your business. Either IBM Workplace Collaboration Services or Lotus Learning Management System can be combined with Lotus Virtual Classroom to offer delivery and tracking of Web-based content, scheduling classrooms and courses, performing student assessments, managing student enrollment activities and creating courseware. Also, you can offer students and instructors a variety of learning activities, including instructor-led classroom training and learning offerings, such as Web-based training, computer-based training programs, self-paced instruction and live virtual classroom sessions.

For more information, visit [ibm.com/software/workplace/learning](http://ibm.com/software/workplace/learning).

### Learning products

#### *IBM Lotus Learning Management System*

Provides the ability to deliver and manage blended learning programs using both traditional classroom and online learning resources. Has a built-in authoring tool for developing customized courseware, can be configured for multiple languages and user profiles, and supports disconnected use to provide access to learning resources for remote/mobile workers. A modular, standards-based solution, Lotus Learning Management System supports enterprise-wide implementations,

interoperates with other products, such as Lotus Virtual Classroom, and streamlines the overall management of training activities. Visit [ibm.com/lotus/learningmanagementsystem](http://ibm.com/lotus/learningmanagementsystem).

#### *IBM Lotus Virtual Classroom*

Delivers live, Web-based interactive training to employees, suppliers and trading partners. Through virtual whiteboard functionality, breakout sessions, structured Web conferencing and record-and-play-back capabilities, Lotus Virtual Classroom enables your organization to cost-effectively and quickly train geographically dispersed audiences, track attendance and certify completion of courses to help ensure effective learning while saving on travel costs. Visit [ibm.com/lotus/virtualclassroom](http://ibm.com/lotus/virtualclassroom).

#### *IBM Workplace Collaboration Services*

Provides full-featured, flexible and standards-based learning capabilities that help organizations manage their training programs more efficiently and integrate learning resources right on the desktop. Users can access recommended courses based on their job roles and other information to help them self-manage their training activities. Integration with other services delivers blended learning experiences and provides students with enhanced tools such as course discussion areas, document sharing, Web conferencing and chat rooms. IBM Workplace Collaboration Services is a single software product providing a completely integrated environment for everyday collaboration with capabilities in addition to learning, including e-mail, calendaring and scheduling, presence awareness, instant messaging, team spaces, Web conferencing, document and Web content management. Visit [ibm.com/software/workplace/collaborationservices](http://ibm.com/software/workplace/collaborationservices).

## Fully integrated collaboration

Fully integrated collaboration software provides multiple capabilities in one product, unifying all the tools and resources users need to communicate, collaborate and transact day-to-day business. These products provide the power and peace of mind of one architecture with one development, deployment and management model and can be customized for each user based on his or her skill level and role in the organization. Their network-centric delivery model centralizes deployment and management and simplifies upgrades, virtually eliminating the need to physically touch each user's desktop or device.

For more information visit: [ibm.com/software/workplace](http://ibm.com/software/workplace).

### Fully integrated collaboration software products

#### *IBM Workplace Collaboration Services*

A single software product providing a completely integrated environment for everyday collaboration. Offering a choice of client experience ranging from a standard browser to a full rich client, Workplace Collaboration Services provides capabilities including e-mail, calendaring and scheduling, presence awareness, instant messaging, learning, team spaces, Web conferencing, document and Web content management. It can be easily changed or adapted all from one easy-to-manage infrastructure. See other categories for details on the supported capabilities. Visit [ibm.com/software/workplace/collaborationservices](http://ibm.com/software/workplace/collaborationservices).

#### *IBM Workplace Services Express*

Provides a complete, easy-to-use single server platform for team collaboration. Its integrated portal makes it easy for you and your colleagues to work together, by providing easy-to-use and easy-to-customize team spaces to create, edit and share documents. Easy and elegant interactions between Microsoft Office, plus several built-in editors give you flexibility and choice in the way your teams create and collaborate on documents. A new Workplace Services Express server can be set up and deployed in under an hour, and customized for just about any team's requirements. Visit [ibm.com/software/workplace/servicesexpress](http://ibm.com/software/workplace/servicesexpress).

### Mobile messaging and collaboration

Extend the messaging and collaboration power of Lotus Domino software, Lotus Instant Messaging software and more to remote access, mobile and wireless devices. Take your most critical technology-based information with you—or maintain real-time connectivity—and be productive wherever you are. With remote access and wireless products and solutions, you can extend unmatched Lotus Notes and Domino, Lotus Instant Messaging and other collaborative capabilities to small, Web-enabled devices, including mobile phones, pagers and PDAs.

For more information, visit [ibm.com/software/workplace/mobile](http://ibm.com/software/workplace/mobile)

## Simply a better way to connect with business

### Mobile messaging and collaboration products

#### *IBM Lotus Domino Everyplace*

Extends the capabilities of Lotus Domino technology to provide a comprehensive platform for reliable and easy-to-administer mobile and wireless device services in a security-rich environment. Helps you provide wireless access to e-mail, calendars and directories, as well as rich collaborative applications. You can access your Lotus Domino software-based information from supported wireless and handheld devices—like PDAs, pagers and digital phones—supporting industry standards, such as Wireless Application Protocol and Short Message Service. Visit [ibm.com/lotus/dominoeveryplace](http://ibm.com/lotus/dominoeveryplace).

#### *IBM Lotus EasySync Pro*

Allows you to synchronize e-mail messages, calendar information, tasks, contacts and memo information between Lotus Notes systems and most commonly used PDAs. Visit [ibm.com/lotus/easysyncpro](http://ibm.com/lotus/easysyncpro).

#### *IBM Lotus Domino Unified Communications*

Enables the convergence of voicemail, e-mail and fax so that all messages are stored in a single location and can be accessed from a variety of supported devices, including telephones and PCs. Extends message access to additional devices and technologies, such as mobile phones, pagers, PDAs and browsers, providing notification features that will alert subscribers in different ways when they receive messages that meet certain criteria. Visit [ibm.com/lotus/duc](http://ibm.com/lotus/duc).

#### *IBM Lotus Instant Messaging Everyplace*

Extends the instant messaging and presence awareness capabilities of Lotus Instant Messaging software to supported handheld wireless devices, such as mobile phones, pagers and PDAs. Visit [ibm.com/lotus/instantmessagingeveryplace](http://ibm.com/lotus/instantmessagingeveryplace).

#### *IBM WebSphere Everyplace Access for Lotus Domino*

Provides flexible access to critical e-mail and personal information management (PIM) information from virtually anywhere, without needing to carry a laptop computer. Transforms mobile and wireless devices into robust collaboration tools—providing a complete synchronization service for wireless Lotus Notes and Domino messaging users. Visit [ibm.com/lotus/weald](http://ibm.com/lotus/weald).

### Solutions and bundles

Whether to help you assess your compliance-related requirements or for an industry-specific collaborative portal. Whether for customer management or to access needed information in real time when solving specific problems, within or across industries. It might be a solution tailored to your employees' roles, complete with IBM skilled services. Or simply a bundle of related products designed for ease of purchase, ease of use and ease of management. IBM Workplace offerings combine the market-leading collaborative capabilities of Lotus software with IBM WebSphere Portal, for example, often with other IBM and third-party business technologies and expertise—to integrate people, in real time, with all aspects of their automated business processes. The way you need it. Fast.

For more information, visit [ibm.com/software/workplace/solutions](http://ibm.com/software/workplace/solutions).

## **Solutions and bundled software products**

### ***IBM Software Solution for On Demand Workplace***

Offers the industry's most powerful collaboration and portal software in one package—for one easy price—delivering a cost-effective way to combine the collaborative strengths of all the IBM Workplace capabilities with the integration power of WebSphere Portal Enable, in one easy-to-buy, easy-to-use, easy-to-manage offering. Integrate business applications and processes, send e-mail, take training courses, exchange instant messages, hold spontaneous or planned Web conferences, manage documents and Web content—all from one common interface. Visit [ibm.com/lotus/software/solutionforondemandworkplace](http://ibm.com/lotus/software/solutionforondemandworkplace).

### ***IBM Workplace for Business Controls and Reporting***

Provides an essential foundation for an organization in its efforts to assess its financial controls in response to Section 404 of the Sarbanes-Oxley Act. Can help companies gather and monitor information about controls in a more consistent and organized manner. This Web-based, end-to-end solution can help provide users with greater visibility into your company's financial processes across the enterprise. Visit [ibm.com/software/workplace/businesscontrols](http://ibm.com/software/workplace/businesscontrols).
